PROFESSIONAL SUMMARY

Software professional with a strong understanding of cloud computing fundamentals and application development. Experience working with cloud-based services such as virtual machines, storage, networking concepts, and identity management. Familiar with deploying, monitoring, and supporting applications in cloud environments, along with working on databases and modern development tools. Continuously developing practical cloud skills to build reliable and scalable systems.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Google Associate Cloud Engineer
- Github Copilot
- Github Foundations

SKILLS

Cloud: EC2, Lambda functions, Terraform, AWS CloudFormation, VMs, Storage Services, IAM.
Backend: .NET, C#, Java, Python, REST APIs
Frontend: React, Javascript, CSS, HTML
Tools: Git, GitHub.

EXPERIENCE

Project Engineer   Mar 2025 – Present
Wipro Ltd.   *Pune*

- Working in a cloud-based project environment, contributing to application deployment and configuration activities.
- Setting up and managing cloud resources such as EC2 compute instances, storage services.
- Participating in application build, deployment, and environment setup processes as part of the project lifecycle.
- Working with cloud security concepts including IAM roles, policies, and controlled access to resources.

Graduate Apprentice   Sept 2024 – Nov 2024
LTIMindtree Ltd.   *Mumbai*

- Completed training in .NET technologies and database fundamentals.
- Learned application architecture and structured development practices.

INTERNSHIP

Trainee Engineer   Jan 2023 – Mar 2023
Proazure Software Solutions Pvt. Ltd.   *Pune*

- Gained exposure to web development and Robotic Process Automation (RPA).
- Assisted in understanding automation workflows and basic software development tasks.

PROJECTS

Cloud-Based Web Application Deployment

Deployed and hosted a static portfolio website using AWS S3 Website Hosting. Implemented CI/CD automation using GitHub Actions and AWS CLI to automatically sync website updates from a GitHub repository to S3 on every commit. Configured AWS IAM user permissions and S3 bucket policies to securely allow deployments and public read access without using object ACLs. Enabled automated deployments on every commit.

Cloud Platforms & Tools: AWS S3, IAM, GitHub Actions, AWS CLI, Git

Customer Management System

Designed and developed a web-based application with full CRUD functionality. Implemented secure authentication and role-based authorization using JWT tokens. Built RESTful APIs for frontend-backend communication.

Tech Stack: .NET, C#, React, REST APIs.

Personal Finance Tracker

Developed an application to track income and expenses with secure user access. Implemented authentication and authorization for data isolation. Focused on clean API design and scalable architecture.

Tech Stack: .NET, C#, React, JWT Authentication, REST APIs

Sign Language Recognition System

Built a real-time hand gesture recognition system for American Sign Language (ASL) alphabets. Used computer vision for hand landmark detection and trained a Random Forest classifier.

Tech Stack: OpenCV, MediaPipe, Random Forest Classifier

ADDITIONAL INFORMATION

- Good communication and interpersonal skills.

- Comfortable working in team-based and structured environments.

- Interested in continuous learning and skill development.
